

# Himani Sinhmar | CV

First year MAE PhD student – Cornell University

📞 +16072797653 • ✉️ hs962@cornell.edu • 🌐 himanisinhmar.github.io

## Research Interests

---

Robotics, Autonomous systems, Cooperative control

## Publications

---

**Himani Sinhmar**, Vinod Kumar, *Relative Autonomous Navigation Without Communication Between Spacecraft Using Line of Sight Measurements*, 8<sup>th</sup> IEEE/CSAA Guidance, Navigation and Control Conference, August 2018, Xiamen, China ([PDF](#))

**Himani Sinhmar**, Srikant Sukumar, *Distributed model independent algorithm for spacecraft synchronization under relative measurement bias*, 5<sup>th</sup> CEAS Conference on Guidance, Navigation and Control (Accepted) ([PDF](#))

**Himani Sinhmar**, Pallavi Rastogi, Shripad P. Mahulikar, *Direct Theoretical Approach to Jet Propulsion Principles based on Pressure Variation inside the Engine*, Preprint 2018 ([PDF](#))

## Academic Qualifications

---

### Indian Institute of Technology Bombay (IIT Bombay)

**GPA : 8.7/10.00**

*B.Tech + M.Tech : Aerospace Engineering*

*2014–2019*

- Cumulative GPA of **9.51** in the last four semesters
- Completed Minor degree in Physics

### Central Board (CBSE)

**Score : 95.6%**

*All India Senior School Certificate Examination*

*2014*

### Central Board (CBSE)

**Score : 10.00/10.00**

*All India Secondary School Certificate Examination*

*2012*

## Notable Achievements

---

- **Chaired** a session on Navigation Technology in 2018 IEEE/CSAA GNC conference held in China
- Awarded the **Undergraduate Research Award** for exemplary contribution to research in 2017-18
- Recipient of INSPIRE scholarship for being in the top 1% in Senior Secondary Examination
- **Presided an International conference** on *Next Generation Skills Development and Challenges in Aeronautical and Aerospace Industry* organized by Aeronautical Society of India
- Inter-school debate winner and best speaker for four consecutive years

## Research Experience

---

### Cooperative Control Under Bias in Measurements

Guide : Prof. Sukumar Srikant , Systems and Control Engg., IIT Bombay

Master's Thesis

May'18 - Jun'19

- Developed a Lyapunov based decentralized control algorithm which ensures that a multi-agent system tracks a time-varying trajectory in presence of an unknown sensor bias in relative position measurements
- **Exponential bias estimation** was achieved by using initial excitation based results in adaptive estimation
- Performed simulations for spacecraft formation under bias in the measurement of relative position

### In-flight IMU Alignment of a Store Dropped from Aircraft

Guide : Dr. Aditya Paranjape, Imperial College of London

Research Internship

May'18 - Aug'18

- Implemented the Kalman filter for **low-cost INS/GPS integration** and multi-sensor fusion providing accurate and speedy estimates of the store states in a fast prototyping environment
- Innovated a self-alignment algorithm capable of working with limited & near-minimal sensor information
- Modeled and validated an IMU Simulator to create repeatable test data in the absence of an IMU unit
- Developed the algorithm to address the Transfer Alignment problem, such that the final algorithm can be used to solve either problem — Self Alignment or Transfer Alignment

### Autonomous Navigation for Spacecraft Rendezvous

Control Dynamics & Simulations Group, ISRO, Bangalore

Research Internship

May'17 - Jul'17

- Formulated and simulated an algorithm for autonomous navigation in the event of **gyro failures or communication eruption** between the spacecraft using only line of sight measurements
- Programmed an Extended Kalman filter for relative state estimation of 6 DOF spacecraft
- Developed a high fidelity model to simulate relative motion in perturbed orbital environment
- Designed a PD controller for static thrusters to perform rendezvous of two satellites

### Modeling of Turbojet and Ramjet Propulsion System

Guide: Prof. S.P. Mahulikar, Aerospace Engg., IIT Bombay

Bachelor's Thesis

Nov'16 - Nov'17

- Developed a methodology to obtain optimal combustion inlet Mach number and temperature for generating maximum thrust in a ramjet for a given flight condition
- Modeled isobaric and variable pressure combustion in jet engine to assess the propulsive efficiency and thrust
- Articulated the model's application to Scramjet engine for generating net positive thrust

## Academic Projects

---

### State Tracking and Fault Diagnosis in Nonlinear uncertain systems

Guide : Prof. Sukumar Srikant, Systems and Control Engg., IIT Bombay

Jan'18 - Apr'18

- Developed a sensor bias estimator accomplishing state tracking in model reference adaptive control setting
- Presented a sensor fault detection scheme for nonlinear systems with unstructured modeling uncertainty
- Implemented algorithms on a 4<sup>th</sup> order longitudinal dynamics model of an aircraft in a wings-level cruise

### Pratham - IIT Bombay Student Satellite Team

Successfully launched on 26<sup>th</sup> September 2016

Aug'14 - Apr'15

- Assisted in modeling of the satellite body, panels and other onboard components in SolidWorks
- Performed structural and thermal simulations of the satellite in ANSYS
- Collaborated in the designing, modeling and characterization of Cross Yagi antennas
- Established communication link with the LEO satellites, receiving data using off-the-shelf equipments

### Self-Balancing Robot

Institute Technical Summer Project, IIT Bombay

May'15 - Jun'15

- Fabricated a model to balance an unstable robotic platform on two wheels using PID Controller
- Incorporated an IMU chip with an Arduino for implementing control algorithm
- Improved stability by fusing calibrated values from the gyroscope and accelerometer with Kalman filter

## Simulations of Internal flows in Turbomachines using FLUENT

Guide : Prof. Kowsik Bodi, Aerospace Engg., IIT Bombay

Jan'16 - May'16

- Modeled axisymmetric swirl flow in a combustion chamber to detect flow reversal
- Simulated channel flow to analyze the effect of fluid parameters on the flow transience to turbulent bursts
- Optimized results by experimenting with meshing models in Ansys-FLUENT to check grid convergence

## Launch Simulation and Analysis of Spitzer Space Telescope

Guide: Prof. Ashok Joshi, Aerospace Engg., IIT Bombay

Mar'16 - Apr'16

- Scrutinized the launch and mission objectives of Spitzer Space Telescope
- Performed an end-to-end simulation of the mission for injection of payload on required Heliocentric orbit
- Determined the mass profiles for different stages of the Delta II 7920H ELV rocket used in the mission

## Prototype Spark Chamber

Guide: Prof. Pradeep Sarin, Engineering Physics, IIT Bombay

Dec'15

- Examined the working of spark chamber built at the University of Cambridge and Birmingham
- Tested methods to design a spark chamber to overcome the problem of corona discharge
- Revised calculations for the voltage required and the pressure of helium in the chamber to be maintained

## Error Analysis in Computational Fluid Dynamics

Guide : Prof. Avijit Chatterjee, Aerospace Engg., IIT Bombay

Jul'16 - Nov'16

- Programmed an algorithm in Python to obtain finite difference scheme of any order of accuracy for a PDE
- Performed Fourier analysis of numerical schemes for dissipation error and stability

## 3-D Modeling of Beverage Dispensing System

Startup firm implementing Automatic System and Method for Dispensing Beverages

Jul'16

- Modeled the structure of the dispenser comprising of a refrigeration unit and multiple taps in SolidWorks
- Generated a 3-D mesh of the dispenser in ICEM which optimally simulated the complex flow

## Position of Responsibility

- **Editor, Department Newsletter - Lift off** May'16 - May'17
  - Researched, edited and proofread the content and interviewed illustrious personalities
  - Executed community outreach for article ideas and development
- **Teaching Assistant, System Modeling Dynamics and Control** Jul'18 - Present
  - Guiding 80+ students with tutorials and MATLAB sessions for a graduate-level course
  - Grading exams and conducting office hours for clarifying doubts of the students

## Key Courses

<b>Systems &amp; Control</b>	Non-linear Dynamics, Multivariable Control, Adaptive Control Theory, Optimal Control, Control System Design Techniques, Flight Dynamics, State Estimation: Theory and Applications, Navigation and Guidance
<b>Mathematics</b>	Calculus, Data Analysis and Interpretation, Differential Equations, Linear Algebra, Numerical Analysis

## Technical Skills

<b>Programming</b>	MATLAB, Maple, Mathematica, C++, Python, FORTRAN, R $\LaTeX$
<b>Softwares</b>	ANSYS, ICEM-CFD, SolidWorks, AutoCAD
