POSITIONS HELD	Princeton University Postdoctoral Research Associate, Leonard Lab Advisor: Prof. Naomi Ehrich Leonard Sept. 2024–present
EDUCATION	Cornell University <i>Ph.D., Aerospace Engineering</i> Specialization in Robotics; Minor in Computer Science Doctoral Advisor: Prof. Hadas Kress-Gazit Aug. 2019–Aug. 2024 Indian Institute of Technology (IIT Bombay) <i>B.Tech. and M.Tech., Aerospace Engineering</i> Specialization in Systems and Control; Minor in Physics Thesis Advisor: Prof. Srikant Sukumar 2014–2019
RESEARCH INTERESTS	My vision is to develop theoretically grounded and resource aware autonomy architectures that make robots safe, goal-directed, smoothly adaptive, and interpretable <i>by design</i> . My current research asks how can a robot decide on a feasible action when the information it needs emerges only after it begins to act? I <i>design, analyze, and certify</i> new decision-making and control methods for interactive autonomy and <i>validate</i> them on robotic hardware. My work draws on insights from dynamical systems, control theory, neuroscience, and collective behavior.
